System Overview

The ZKTeco 2MP Starlight Face Recognition Camera offers Artificial Intelligence at the edge – performing complex real-time facial recognition and facial feature comparison without the need for an external database. The camera perfectly provides accurate recognition result and further white/black list application. Meanwhile benefit by outstanding Sony STARVIS sensor and ISP optimization, it's capable of balancing light throughout the scene and promising crystal clear images in dark environment. Cloud function is built-in for every device, which is more convenient and flexible for real-time and remote viewing from APP and VMS.

Functions

H.265+

Delivering high quality video with up to 70% bandwidth saving. H.265+ is the evolutionary optimization of H.265 and traditional H.264. The Smart H.265+ includes a series of scene-adaptive encoding strategies such as Dynamic ROI, flexible multi-frame reference structure and smart 2D&3D noise reduction.

IVA (Intelligent Video Analysis)

IVA is a built-in video analytic algorithm that detects object behaviors in a specific area, such as Tripwire violations, intrusion detection, abandoned or missing objects, and the number of targets enter and exit. A camera with IVA will deliver quickly and accurately responds to monitoring events that makes surveillance more intelligent and efficient.
