

Biometric Fixed Arm Tripod Turnstile

TS2100S Tripod Turnstile

TS2111S Tripod Turnstile with Control and RFID Reader

TS2122S Tripod Turnstile with Control and Fingerprint & RFID Reader

Tripod turnstiles are compact and cost-effective entrance solutions designed for smooth and silent operation, less wear and tear and reduced power consumption, suitable for areas where there is a large flow of people.

The TS2100S series offer a slim, two-legged casework made of stainless steel, ideal for sites where large flows of people and space are issues.

On receiving a signal from the access control system, or push button, it allows the passage of one person at a time. The status is shown on the led-way mode indicators on the top. Passage in both directions is electronically controlled. Default mode is to lock the mechanism until a valid authorization signal is received. If you want to set one side free, you can have it by adjusting the mechanism. In case of emergency, power off the device, the user can rotate the arm for free passage. Led way mode indicators included as standard.

Features

Reliability

- Alloy steel tripod hub prevents mechanical wear
- Casework and tripod arms manufactured in SUS304 stainless steel
- ZK patented compact mechanism ensure the long life of the lubricating oil inside.
- High quality electrical components

Safety and User-Orientated Design

- There are no exposed screws, it is safer for the user.
- Smooth operation designed for mass transit application
- The pictogram on the device indicating access permission and direction of movement
- Special designed case shape, it is user-friendly for passenger to punch card or finger.
- Anti-tailgate

Easy Integration

- Flexible reader installation plate. Customer can easily integrate third party reader.
- Standard electrical interface for third party device.
- Using compact mechanism, the turnstile has more space inside for integration
- ZKTeco provides integration service in factory, with board and peripherals installed, ensuring compliance of the system. When the turnstile is delivered, just and plug in and do the setting. Save the cost of installation.
- The two columns at the ends provide more space for system integration

Specifications

Power Supply	AC 220V/110V, 50/60Hz
Operating Temperature	-28 °C- 60 °C
Operating Humidity	5%-85%
Working Environment	Indoor/Outdoor(shelter)
Rated Power	60W
Flow Rate	Max 30 passage/minute
Ingress Protection	IP54
Casework Material	SUS304
Pictogram Indication	Yes
Control System	Input controlled by dry contact
Emergency Button Input	Yes
Dimension	110×98×18(CM) + arm length 50CM
Package Dimension	120×108×28(CM)
Net Weight	38.5KG
Gross Weight with Package	46.5KG
Optional Function	Alternative Material or shape, third-party access control integration, passage counter
